youtube Showreel Channel: Creative 3D World Ltd.

**OBJECTIVE:** As a holder of a non design degree, i aspire to broaden my knowledge, explore my creative ability, contribute in highly challenging projects as a 3D artist, with a talented and successful studio that produce low and high resolution art assets and for video games, cartoons, simulators and movies, and willing to work with people with the same mind set. I specialize in hard surface and organic modeling. I also have understanding in texturing, lighting, rendering, animations, rigging, video editing, compositing, visualization and little of digital sculpturing. As a freelancer in a place where 3d art it is not popular, utilized and encouraged and also of no value. Being employed by successful animation and filming studios will enable me explore my innovative abilities.

The essence of learning 3d initially is to be able to add more value to my movie which are mostly fantasy and sci-fi because i used to be a fan of comic books and cartoon since childhood.

## PERSONAL DATA:
