RFAVQ – Intro to Art Direction. 2015

Experienced Screen Professional

As a Production Designer or Art Director, I have dedicated myself to creating sets and pieces that carry the intention desired forward into the imaged world of the director. I can thank many of the skills to the experiences I gained from my peers in the many areas of film making and animation production.

I have worked 20 years in film and digital media either as an art director or an artist, where in part 14 years as the producer (President & CEO) of my own animation studio where I was able to work on many complex and challenging projects and styles. From that experience, it allowed me to access positions as Multimedia content supervisor, Assistant decorator, Assistant SFX technician, On-set playback technician & Graphic artist to name a few. So I consider myself multifaceted towards my approach to my works.
