To whom it may concern;

Seaomeng Naomi Motlhasedi, ID number 9208230856080, is a hard working young lady who does her work with minimum supervision. She works well as an individual and can also be an active team player if need arises.

She was employed at CTI as lecturer for the module CORM320 Research Methodology 3B where she acted as supervisor for three third year research groups. The projects were submitted on time and all three of the projects passed. She was always punctual, professional and strict when needed. She showed compassion for the students and urged them to always perform at their best.

I enjoy working with Naomi. She always completed all tasks assigned to her to the best of her ability. She regularly asks for feedback and is willing to improve where her performance when the need arise.

Yours sincerely,

Anzelle Beneke  
Academic Coordinator
