Science Fair AWARD: Grade 6 3rd in Calgary "What are the Odd and Important Features of the Constellations?" (thousands of stars charted & light box projector invention) Calgary, AB

I have a proven track record of prolific penmanship including scientific inquiry, biomedical research, 30 journal/mo. review '90-'95 led to 4 Gumtex dental surgical models (most cost effective, sold like hotcakes to 40 countries) training system and thesis: Implantology as a Viable Treatment Option with US sponsors & instrument manufacturers' awards taught dental implantology - diagnosing, treatment planning, placement, suturing, restorative, prosthodontics, periodontology et al via hands on table clinics/ lectures in the US & internationally to students, clinicians and profs '95-'00. Peer reviewed scientific papers published (Lasers in Surgery & Medicine - volunteered Gimbel Eye Clinic, tested ALL Lasers, Dentistry in Space using a Modified 0 Gravity Chamber New Form of Evolved Morbillivirus et al) which evolved into harrowing sci fi thrillers initially inspired by a 4 min interview with Robin Cook about how he penned a best seller each summer in 6 weeks, a 1985 CDA Journal article about Conan Doyle, a physician & creator of Sherlock Holmes & Michael Crichton's compelling sci fi concepts. Why not dentists? I said "by God I can do that." I persevered, researched, transformed complex concepts into compelling content in my thrillers including designing several Disney style resorts, 'Bulakai' means 'to your health' (Fijian) in 'Not A Drop' ; 'Ulusaba' means 'place of little fear' in 'Lion Island' aka 'Ngala Prehistoric Park' & a Jurassic World type resort in 'Terror Island'. Editing, cover design, publishing, global marketing '04-'08. My books are next to Zane Grey's in the ADA Library Archives, Chicago. I penned a 320+ pg thriller each summer in 6 weeks since '85, 32 'Dr Gum' episodes, the irascible, indestructible, gumshoe dental detective (think Sherlock, Bond). Founded www.CalteXPress.com 2005. Self Published 37 books in 5 yrs with most cost effective US printers. Inspired by a TV producer on a US wide radio book tour to adapt my books to films, 102 90-120+ min/pgs screenplay adaptations resulted '09-'13, '19- Film Editor '19-'22 created 105 MP4 3-5 min trailers with sound/visual fx created with Avid Media Composer, Adobe After Effects, Filmora 9, Cinema 4 and DaVinci Resolve <https://www.facebook.com/caltexpress/videos> several in discussion as films. In Gold We Trust (next in the National Treasure series) Dead Hand, Fifth Pillar (Jurassic Park/ World story arcs) Westworld season IV, Finger of God (Twister reboot) Meteorite- think Andromeda Strain sequel, Fantastic Voyage sequel, Rising - Paranormal Activity sequel, Justice League Doomed, The ROM (Jurassic Park sequel) voted #1 2010 BOSI Video pitch contest, pitched to 20,000 paleontologists, animatronics experts, a \$100 million dinosaur thriller planned. Inspired 6 sequels and 3 books in an ever expanding dinoverse. Universal Studio lawyers said 'great writing', but can't explain 127 copyright infringements discovered in Jurassic World et al. Libr. of Congress cert PAU 3-823-071 prima facie evidence, coincidence? inspiration v execution? Unrau v Amblin et al. (studied patent, IP, copyright law) '16 – Files hacked/ stolen.10,000,000 words, 25,000 highly original scenes, 37 books, 88 screenplays, a smorgasbord of creativity, passed up the studio food chain, reworked, claimed as their own. FBI cybercrime filed Jan '18 USDOJ. Entertainment lawyers said my time was worth \$5 million & writing credit. Overturn in highest court. 'Vengeance is mine. I shall repay saith the Lord.' Rom 12:17-19 KJV Thank you for taking the time to review my resume.

Best regards,
