Experience

JANUARY 2002 - PRESENT

Freelance, Remote - *Composer & Audio Engineer*

- Freelance composer & audio engineer, delivering collaborative solutions for global clients to help further their missions and improve their projects. Working to briefs in various musical genres I oversee all aspects of my projects from inception to delivery to ensure audio design goals are met
- Composition:
 - Create original music in a range of moods and styles to match themes, storytelling, and brand voice
 - Collaborate with storytellers, directors and producers
- Sound Design:
 - Source and/or create sound effects, environments, and soundscapes
- Audio Engineering:
 - Edit & clean up audio; remove pauses, mouth noise; pace dialogue; optimize tone and dynamics
 - Mix music, dialogue and effects to create a seamless whole
- Project management
 - Manage multiple projects simultaneously
 - Collaborate with multiple external parties to meet client goals and deadlines
 - Create materials to spec, respond quickly and accurately to client feedback
 - Organize, manage, and archive client deliverables
